Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613)990-8203:

(1) THESE INDICATORS ARE CALCULATED BY THE REWEIGHTING OF RETAIL TRADE BY TYPE OF BUSINESS (CATALOGUE 63-005) TO OBTAIN RETAIL TRADE BY COMMODITY. THE WEIGHTS WERE TAKEN FROM THE 1974 RETAIL COMMODITY SURVEY (CATALOGUE 63-526). PASSENGER CAR SALES ARE TAKEN FROM NEW MOTOR VEHICLE SALES (CATALOGUE 63-007) AND ARE USED AS AN INDICATOR OF SALES OF CARS TO PERSONS. SEASONAL ADJUSTMENT IS DONE BY COMMODITY TO END POINT.

FOR MORE INFORMATION REFER TO TECHNICAL NOTE, CURRENT ECONOMIC ANALYSIS, FEBRUARY 1982.

(2) THESE DATA ARE THE RESULT OF DEFLATION BY COMMODITY OF THE RETAIL SALES DATA CALCULATED BY THE METHODOLOGY EXPLAINED BY FOOTNOTE 1.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 990-8203.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 990-8203.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 990-8203:

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 990-8203:

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 990-8203:

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The purpose of the **Quarterly Economic Summary** is to provide a quarterly description of macro-economic conditions and thereby to extend the availability of information on the macro-economy provided by the System of National Accounts.

The publication provides a more detailed analysis than is available in the monthly **Current Economic Indicators**. In particular, the sectoral analysis of the data provides relevant information on industrial and regional developments. Tables of the source data, as well as transformations useful for current economic analysis are available in the **Quarterly Economic Summary: Statistical Supplement**.

Technical terms and concepts used in this publication that may be unfamiliar to some readers are briefly explained in the glossary. More extensive feature articles will appear in this publication from time to time explaining these technical terms and concepts in more detail.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

Preface

The Quarterly Economic Summary: Statistical Supplement complements the description of the economic conditions contained in the "Current Economic Indicators" and "Quarterly Economic Summary" publications. The analysis provided by these publications is based mainly on data provided by the Statistical Supplement, including analytically useful transformations such as percentage changes, ratios, smoothed time series, etc. Because of this emphasis on analytical transformation of the data, the publication is not meant to serve as a compendium of source data on the macro-economy. Users requiring such a compendium are urged to consult the Canadian Statistical Review.

In tables containing percentage changes, monthly values are the percentage changes from the previous month, quarterly values are the percentage changes from the previous quarter, and annual values are the percentage changes from the previous year.

We are currently working towards an amalgamation of this publication with the Canadian Statistical Review early in the new year. More information will be soon sent to subscribers.

CANSIM Note

CANSIM[†] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data not included in this publication are available from CANSIM.

The numbers at the top of most columns identify the underlying series on CANSIM.
